EXPERIENCE

Rainbow Child Care Center, Troy, MI *Network Administrator*

2014 - 2015

- Maintained Active Directory accounts in the company server.
- Created and reset passwords for employees as needed.
- Supported all locations computers remotely from Rainbow Child Care Center's Corporate Office.
- Trouble shoot non-working computers both in office and remotely.
- Trouble shoot and fix printer issues both in office and remotely.
- Troubleshoot network issues, and deal with service providers when needed.
- Set up computers for new locations, or as replacements.
- Set up new computers on our domain for corporate office employees.
- Configured new routers when replacements are needed, or when new locations are added. This includes configuring VPN connections, setting up proper wireless security, and inputting the static IP information from the service provider. Configured wireless access points. Set up new printers both in office and at locations. This includes setting up network configuration to allow network printing, installing the proper drivers on the user's computer, and smtp server configuration to allow scanning to email.
- Setup network and various devices at new locations, which includes installing security cameras and DVR, computers, router, phone systems, and printers.

Washington Real Estate Investment Trust, Washington, DC *Leasing Consultant*

2013 - 2014

- Worked with prospective residents, showing apartments, processing applications and handling other paperwork
- Updated advertising (Craigslist), maintain Facebook page
- Maintained DoorKing.

EDUCATION

Galvanize, Denver, CO — *Web Development Immersive*

Oakland University, Rochester, MI — *Political Science*

Graduation: 2011 GPA: 3.16

PROJECTS

Java Workshop

A workshop that I created to teach Java to the students in my Galvanize Program. We met once a week, and went from setting up their Java environment up to topics such as interfaces and Lists.
